

An Easy and Convenient Solution

Quickcharge is an innovative cashless payment solution that was developed for use with Kronos® solutions. It allows employees to use their ID badges to make cash-free purchases at on-site locations via payroll deduction or prepaid declining balance. The Quickcharge software easily integrates with existing Kronos software and helps reduce administrative and overhead costs, increase revenues, and foster employee satisfaction.

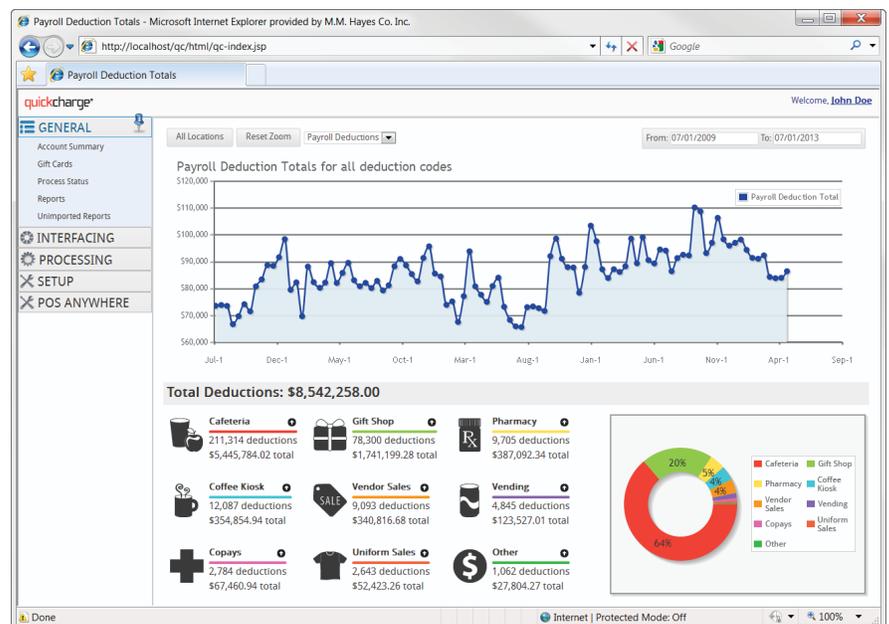

By leveraging existing timekeeping and payroll software, Quickcharge can be implemented quickly and efficiently — often in a matter of days. It can also be easily installed on an existing server or on a stand-alone server.

Benefits for employees

- Transactions are faster and more convenient, with no need to carry cash
- Purchases can be deducted directly from paychecks
- Payments can be spread over multiple pay periods
- My Quickcharge, a web-based portal, provides detailed, accurate records of each transaction
- Balances and transaction history can be viewed on Kronos timecards and time clocks

Benefits for employers

- Increased revenues at cafeterias, company stores, gift shops, vending machines, and much more
- Seamless integration with existing payroll software, eliminating the labor-intensive task of manually processing payroll deduction slips
- No transaction fees — drastically reduces credit and debit card fees paid by the organization
- Ensures more accurate bookkeeping and accounting by reducing the number of cash transactions
- Real-time validation of all transactions at the point of sale
- Configurable spending profiles for each employee group, allowing for global control of all venues with a single platform
- On-demand reporting for detailed analysis of all data collected

Flexible and accurate to meet your needs

Quickcharge can be configured to meet the particular needs of any organization. Compatibility with all major payroll systems allows Quickcharge to completely automate the cashless payment process, eliminating any need for manual entry. When an employee makes a purchase at the cafeteria or another venue, Quickcharge records the transaction and feeds the data directly to the existing time and attendance or payroll system. Quickcharge also imports data from these systems in order to assign each employee a specific spending profile.

Quickcharge spending profiles allow organizations to set both global and venue-specific spending limits for each employee group. Spending profiles also offer the ability to establish a payback period by allowing transactions to be split over multiple pay periods if desired. This detailed control allows employers to easily ensure compliance with state and federal regulations regarding payroll deduction.

“Eighty percent of our employees are using Quickcharge because it’s a quicker, easier, painless way to pay for their meals. We’ve definitely seen an increase in our cafeteria revenues since introducing Quickcharge.”

*Judy Sisler, Director of Nutrition Services,
Davis Memorial Hospital*

Quickcharge has many uses

- **Typical Venues**

Typical Quickcharge venues include locations such as cafeterias, coffee kiosks, third-party food service operators, company stores, convenience stores, and uniform stores. Additional uses include parking fees, departmental catering, charitable donations, and event ticket sales.

- **Additional Uses for Healthcare**

Healthcare organizations benefit from many specialized uses for Quickcharge such as gift shops, pharmacies, clinics and physicians’ offices, copays, elective surgeries, vendor sales, daily allowances for residents and volunteers, and meal cards for patients and their families.

- **Cashless Vending with Quickcharge**

Adding Quickcharge capabilities to vending machines allows employees to make cash-free vending purchases while still allowing organizations to avoid the high credit and debit card fees attached to small purchases.

- **Quickcharge Gift Cards**

With Quickcharge gift cards, employers can reward employees for perfect attendance or other incentive programs, provide daily meal allowances, allow employees to buy gift cards for visiting family members, or offer the perfect prize for company-sponsored contests for employees.

- **Wellness and Loyalty**

Quickcharge allows organizations to establish loyalty programs through which employees can earn points for purchasing certain items. For example, employers can encourage healthy eating by assigning point values to nutritious food options. When an employee earns enough points, he or she automatically receives a credit toward the next purchase.
